

PYROPOWER®

OFF GRID POWER PLANT

WASTE TO ELECTRICITY SOLUTION

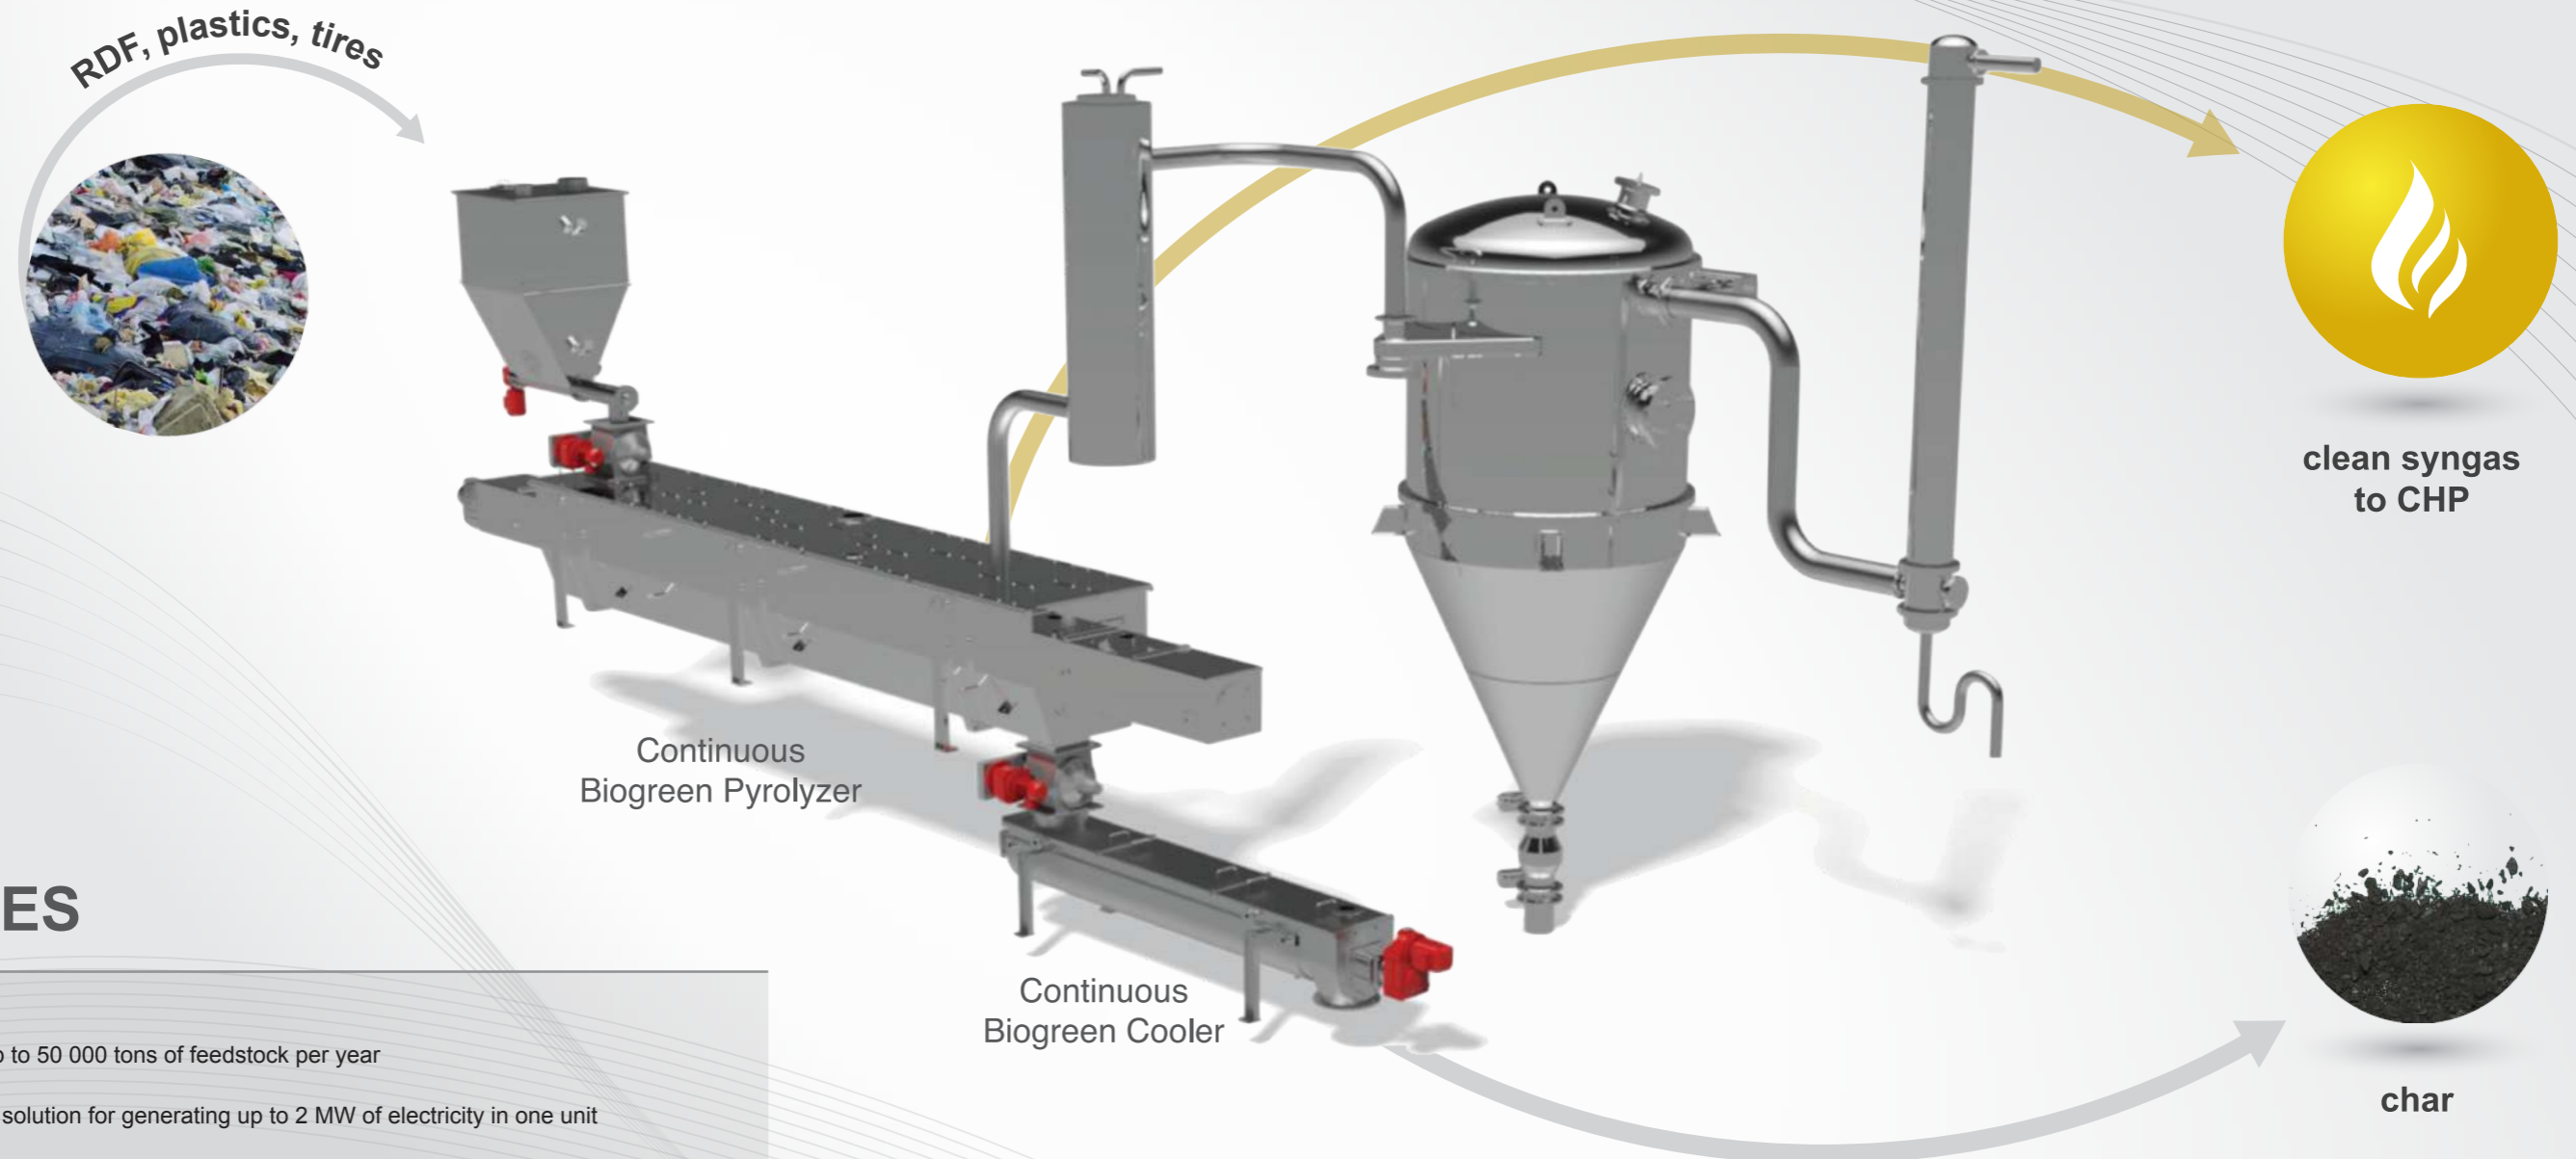

Patented technologies

Think sustainable.

PYROPOWER® General Concept

Biogreen®
Patented technologies

FEATURES

- Flexible solution up to 50 000 tons of feedstock per year
- Complete turn-key solution for generating up to 2 MW of electricity in one unit
- Containerized and compact technology with small footprint
- Simple and effective with the variety of waste
- Up to 85% of syngas production (depends on feedstock)
- Syngas LHV from 16 to 35 MJ/Nm³
- High efficiency electricity production
- Syngas can be used into gas engine, dual fuel engine or gas turbine
